LC5006

\*\*\*\* Bill No. \*\*\*\*

Introduced By \*\*\*\*\*

By Request of the \*\*\*\*\*

A Bill for an Act entitled: "An Act providing that final plat approval for a subdivision may not be granted unless the applicant submits evidence that a permit to appropriate water pursuant to Title 85, chapter 2 has been obtained; amending sections 76-3-622 and 76-4-104, MCA; providing an immediate effective date and an applicability date."

Be it enacted by the Legislature of the State of Montana:

NEW SECTION. **Section 1. Evidence of right to appropriate water.** (1) Except as provided in subsection (2), the department may not grant final subdivision approval until the applicant submits evidence that a permit to appropriate water pursuant to Title 85, chapter 2 has been obtained.

(2) Evidence of a right to appropriate water is not required if the water supply is from wells exempt from water right permitting under 85-2-306.

**Section 2.** Section 76-3-622, MCA, is amended to read:

**"76-3-622. Water and sanitation information to accompany preliminary plat.** (1) Except as provided in subsection (2), the

subdivider shall submit to the governing body or to the agent or agency designated by the governing body the information listed in this section for proposed subdivisions that will include new water supply or wastewater facilities. The information must include:

(a) a vicinity map or plan that shows:

(i) the location, within 100 feet outside of the exterior property line of the subdivision and on the proposed lots, of:

(A) flood plains;

(B) surface water features;

(C) springs;

(D) irrigation ditches;

(E) existing, previously approved, and, for parcels less than 20 acres, proposed water wells and wastewater treatment systems;

(F) for parcels less than 20 acres, mixing zones identified as provided in subsection (1)(g); and

(G) the representative drainfield site used for the soil profile description as required under subsection (1)(d); and

(ii) the location, within 500 feet outside of the exterior property line of the subdivision, of public water and sewer facilities;

(b) a description of the proposed subdivision's water supply systems, storm water systems, solid waste disposal systems, and wastewater treatment systems, including whether the water supply and wastewater treatment systems are individual,

shared, multiple user, or public as those systems are defined in rules published by the department of environmental quality;

(c) a drawing of the conceptual lot layout at a scale no smaller than 1 inch equal to 200 feet that shows all information required for a lot layout document in rules adopted by the department of environmental quality pursuant to 76-4-104;

(d) evidence of suitability for new onsite wastewater treatment systems that, at a minimum, includes:

(i) a soil profile description from a representative drainfield site identified on the vicinity map, as provided in subsection (1)(a)(i)(G), that complies with standards published by the department of environmental quality;

(ii) demonstration that the soil profile contains a minimum of 4 feet of vertical separation distance between the bottom of the permeable surface of the proposed wastewater treatment system and a limiting layer; and

(iii) in cases in which the soil profile or other information indicates that ground water is within 7 feet of the natural ground surface, evidence that the ground water will not exceed the minimum vertical separation distance provided in subsection (1)(d)(ii);

(e) for new water supply systems, unless cisterns are proposed, evidence of adequate water availability:

(i) obtained from well logs or testing of onsite or nearby wells;

(ii) obtained from information contained in published

hydrogeological reports; or

(iii) as otherwise specified by rules adopted by the department of environmental quality pursuant to 76-4-104;

(f) evidence of sufficient water quality in accordance with rules adopted by the department of environmental quality pursuant to 76-4-104;

(g) a preliminary analysis of potential impacts to ground water quality from new wastewater treatment systems, using as guidance rules adopted by the board of environmental review pursuant to 75-5-301 and 75-5-303 related to standard mixing zones for ground water, source specific mixing zones, and nonsignificant changes in water quality. The preliminary analysis may be based on currently available information and must consider the effects of overlapping mixing zones from proposed and existing wastewater treatment systems within and directly adjacent to the subdivision. Instead of performing the preliminary analysis required under this subsection (1)(g), the subdivider may perform a complete nondegradation analysis in the same manner as is required for an application that is reviewed under Title 76, chapter 4.

(2) A subdivider whose land division is excluded from review under 76-4-125(2) is not required to submit the information required in this section.

(3)(a) Except as provided in subsection (3)(b), evidence that an application for a permit to appropriate water pursuant to Title 85, chapter 2 has been submitted.

(b) Evidence of an application for a right to appropriate water is not required if the water supply is from wells exempt from water right permitting under 85-2-306.

~~(3)~~(4) A governing body may not, through adoption of regulations, require water and sanitation information in addition to the information required under this section unless the governing body complies with the procedures provided in 76-3-511."

**Section 3.** Section 76-4-104, MCA, is amended to read:

**"76-4-104. Rules for administration and enforcement.** (1)

The department shall, subject to the provisions of 76-4-135, adopt reasonable rules, including adoption of sanitary standards, necessary for administration and enforcement of this part.

(2) The rules and standards must provide the basis for approving subdivisions for various types of public and private water supplies, sewage disposal facilities, storm water drainage ways, and solid waste disposal. The rules and standards must be related to:

- (a) size of lots;
- (b) contour of land;
- (c) porosity of soil;
- (d) ground water level;
- (e) distance from lakes, streams, and wells;

(f) type and construction of private water and sewage facilities; and

(g) other factors affecting public health and the quality of water for uses relating to agriculture, industry, recreation, and wildlife.

(3) (a) Except as provided in subsection (3)(b), the rules must provide for the review of subdivisions by a local department or board of health, as described in Title 50, chapter 2, part 1, if the local department or board of health employs a registered sanitarian or a registered professional engineer and if the department certifies under subsection (4) that the local department or board is competent to conduct the review.

(b) (i) Except as provided in 75-6-121 and subsection (3)(b)(ii) of this section, a local department or board of health may not review public water supply systems, public sewage systems, or extensions of or connections to these systems.

(ii) A local department or board of health may be certified to review subdivisions proposed to connect to existing municipal water and wastewater systems previously approved by the department if no extension of the systems is required.

(4) The department shall also adopt standards and procedures for certification and maintaining certification to ensure that a local department or board of health is competent to review the subdivisions as described in subsection (3).

(5) The department shall review those subdivisions described in subsection (3) if:

(a) a proposed subdivision lies within more than one jurisdictional area and the respective governing bodies are in disagreement concerning approval of or conditions to be imposed on the proposed subdivision; or

(b) the local department or board of health elects not to be certified.

(6) The rules must further provide for:

(a) providing the reviewing authority with a copy of the plat or certificate of survey subject to review under this part and other documentation showing the layout or plan of development, including:

(i) total development area; and

(ii) total number of proposed dwelling units and structures requiring facilities for water supply or sewage disposal;

(b) adequate evidence that a water supply that is sufficient in terms of quality, quantity, and dependability will be legally available through a water appropriation right provided for in Title 85, chapter 2, if necessary, to ensure an adequate supply of water for the type of subdivision proposed;

(c) evidence concerning the potability of the proposed water supply for the subdivision;

(d) adequate evidence that a sewage disposal facility is sufficient in terms of capacity and dependability;

(e) standards and technical procedures applicable to storm drainage plans and related designs, in order to ensure proper drainage ways;

(f) standards and technical procedures applicable to sanitary sewer plans and designs, including soil testing and site design standards for on-lot sewage disposal systems when applicable;

(g) standards and technical procedures applicable to water systems;

(h) standards and technical procedures applicable to solid waste disposal;

(i) criteria for granting waivers and deviations from the standards and technical procedures adopted under subsections (6) (e) through (6) (h);

(j) evidence to establish that, if a public water supply system or a public sewage system is proposed, provision has been made for the system and, if other methods of water supply or sewage disposal are proposed, evidence that the systems will comply with state and local laws and regulations that are in effect at the time of submission of the preliminary or final plan or plat; and

(k) evidence to demonstrate that appropriate easements, covenants, agreements, and management entities have been established to ensure the protection of human health and state waters and to ensure the long-term operation and maintenance of water supply, storm water drainage, and sewage disposal facilities.

(7) If the reviewing authority is a local department or board of health, it shall notify the department of its

recommendation for approval or disapproval of the subdivision not later than 50 days from its receipt of the subdivision application. The department shall make a final decision on the subdivision within 10 days after receiving the recommendation of the local reviewing authority, but not later than 60 days after the submission of a complete application, as provided in 76-4-125.

(8) Review and certification or denial of certification that a division of land is not subject to sanitary restrictions under this part may occur only under those rules in effect when a complete application is submitted to the reviewing authority, except that in cases in which current rules would preclude the use for which the lot was originally intended, the applicable requirements in effect at the time the lot was recorded must be applied. In the absence of specific requirements, minimum standards necessary to protect public health and water quality apply.

(9) The reviewing authority may not deny or condition a certificate of subdivision approval under this part unless it provides a written statement to the applicant detailing the circumstances of the denial or condition imposition. The statement must include:

- (a) the reason for the denial or condition imposition;
- (b) the evidence that justifies the denial or condition imposition; and
- (c) information regarding the appeal process for the denial

or condition imposition.

(10) The department may adopt rules that provide technical details and clarification regarding the water and sanitation information required to be submitted under 76-3-622."

NEW SECTION.    **Section 4. {standard} Codification**

**instruction.** [Section 1] is intended to be codified as an integral part of Title 76, chapter 4, and the provisions of Title 76, chapter 4, apply to [section 1].

NEW SECTION.    **Section 5. {standard} Effective date.** [This

act] is effective on passage and approval.

NEW SECTION.    **Section 6. Applicability.** [This act] applies

to subdivision applications for which the final plat has not been approved on or after [the effective date of this act].
